

INVESTIGATION 01 — SVCHOST.EXE

Event ID: 1 — Process Creation

Host: WIN11-SOC-LAB

Process: svchost.exe

Path: C:\Windows\System32\svchost.exe

Command Line: C:\WINDOWS\system32\svchost.exe -k netsvcs -p -s
wlidsvc

User: NT AUTHORITY\SYSTEM

Integrity Level: System

Company: Microsoft Corporation

Initial Classification: BENIGN

Analysis:

The process is a legitimate Microsoft Windows executable running from the expected System32 directory. The command line indicates that it is hosting the legitimate wlidsvc Windows service. No obvious suspicious indicators were observed.

SOC Conclusion:

No malicious activity identified from this event alone.

INVESTIGATION 02 — WMIPRVSE.EXE

Event ID: 1 — Process Creation

Event Time: 20-Aug-2026 15:59:29 UTC

Host: WIN11-SOC-LAB

Process: WmiPrvSE.exe

PID: 7656

Path: C:\Windows\System32\wbem\WmiPrvSE.exe

Command Line: C:\WINDOWS\system32\wbem\wmiprvse.exe -secured -
Embedding

User: NT AUTHORITY\NETWORK SERVICE

Integrity Level: System

Company: Microsoft Corporation

Parent PID: 948

Parent Image: Not available

SHA256:

47C8843760F9F9C1086F844A7B746323D9EDD44F453183848812F53863
5D12DF

Initial Classification: BENIGN / NO OBVIOUS SUSPICIOUS INDICATORS

Analysis:

The process is a legitimate Microsoft Windows WMI Provider Host executable running from the expected System32\wbem directory. The command line uses the normal -secured -Embedding parameters associated with WMI Provider Host operation. The process is running under the NT AUTHORITY\NETWORK SERVICE account. No obvious suspicious indicators were observed in this event. Parent process information was unavailable in the event.

SOC Conclusion:

No malicious activity identified from this event alone. The event is consistent with legitimate Windows WMI activity.

INVESTIGATION 03 — POWERSHELL.EXE

Event ID: 1 — Process Creation

Event Time: 20-Aug-2026 19:08:13

Host: WIN11-SOC-LAB

Process: powershell.exe

PID: 4640

Path: C:\Windows\System32\WindowsPowerShell\v1.0\powershell.exe

Command Line:

"C:\WINDOWS\System32\WindowsPowerShell\v1.0\powershell.exe" -
NoProfile -Command "Write-Host 'SOC Lab Test - Suspicious PowerShell
Execution'"

User: WIN11-SOC-LAB\shali

Integrity Level: Medium

Parent Process: powershell.exe

Parent PID: 4480

SHA256:

0FF6F2C94BC7E2833A5F7E16DE1622E5DBA70396F31C7D5F5638187031
7E8C46

Initial Classification: SUSPICIOUS — LAB-SIMULATED ACTIVITY

Analysis:

The process is a legitimate Microsoft PowerShell executable running from the expected Windows System32 directory. However, the process was executed with the -NoProfile and -Command parameters to directly execute a command. The command only uses Write-Host and does not perform a malicious action. The event was intentionally generated as simulated suspicious activity for this SOC lab.

SOC Conclusion:

Suspicious PowerShell execution was detected and investigated. No malicious behavior was identified from this event alone. The activity demonstrates how Sysmon Event ID 1 can capture PowerShell execution details and process relationships.
